desc:

This online fast food store is built with React and Vite for high performance and fast loading. Users can browse products, view details, and add them to their cart. Redux Toolkit manages the cart, while JSON Server handles data. Swiper, AOS, and Toastify enhance the experience with animations and notifications.

- Full-Stack News Project

Link: <https://github.com/Erfan-Sahafi/news-project>

desc: This news platform is built using Node.js, Next.js, Express.js, MongoDB, Tailwind CSS, Fastest Validator, and React Hook Form. It displays news from reliable sources in various categories, allowing users to browse and receive the latest updates.
